

## MOTORIZED ADJUSTABLE WALL MOUNT

Classroom technology should not be limited to just a few. ConenMounts motorized Wall Mount Light<sup>™</sup> provides 20" of height adjustment, providing teachers and students an optimum ergonomic and writing position and enabling even those in early grades or in wheelchair to participate.

The wall mount supports 55" – 86" flat panel displays and works by a simple, push-button operation.

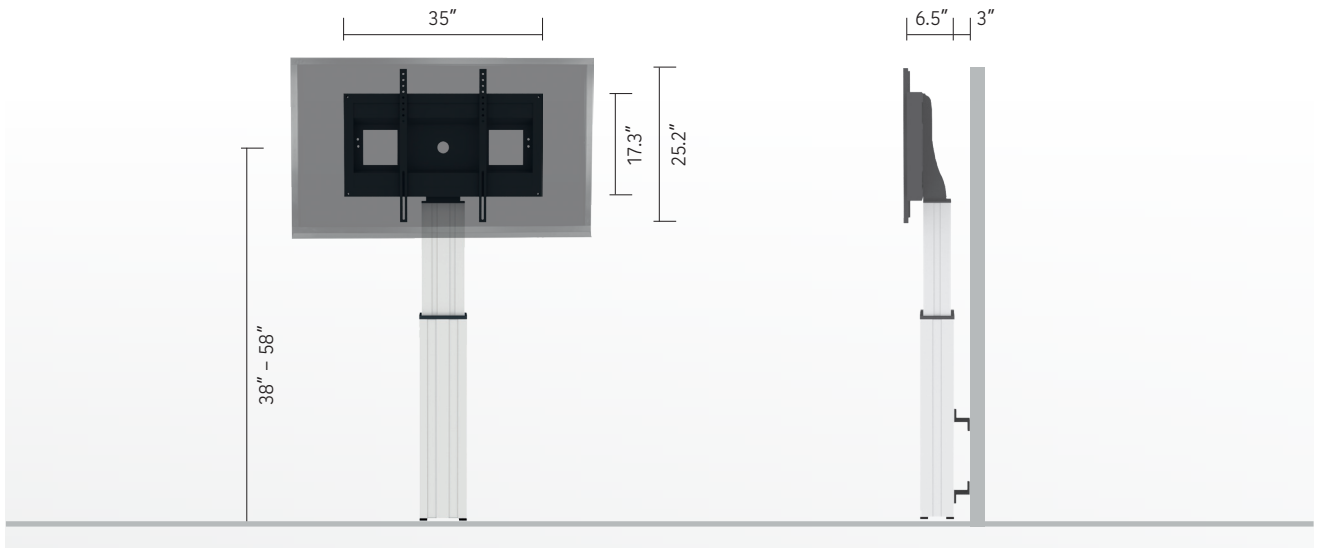

Because the weight of the display is distributed to the floor, the wall mount allows for the display to be mounted to any type of wall, without the need for reinforcement, and allows mounting over existing boards.

The system is maintenance-free, complies with the requirements of the ADA standards and is backed by a 5 year warranty.

### Key features
